

Lab Supply

54 Remington Drive Highland Village TX 75077

Lab Supply Announces the Availability of the *TransBox*

The *TransBox* provides an economical means for animal care staff to transport rodents from vivariums to laboratories. This box is designed for temporary containment and is disposable.

The *TransBox* ships flat and is easily assembled by pressing on the sides of the box to open it and then folding the floor inward, folding the two small side tabs inward and then tucking the bottom tab into the slot.

After placing a rodent(s) into the box, you can close the top by pressing the handle tabs together. (click on video at the right) 

Alternately, you can tuck the handle tabs into the box to produce a stackable box.

The *TransBox* is available for small and larger rodents. The small size is 5'x5"x5" and the large size is 7"x7"x7". Both sizes are shipped 100 per case.

Ordering

The price for the *TransBox* - *Small* is \$89.00 per case.

The price for the *TransBox* - *Large* is \$109.00 per case.

Orders can be placed by telephone (800-262-5258) or mail. We accept checks, credit cards or purchase orders.

Please call or email to jhraynor@labsupplytx.com if you have any questions or if you would like to receive a sample.
